Subject: comment regarding proposed MicroSoft settlement

To whom it may concern:

I am writing to express my strong belief that the currently proposed settlement in the Microsoft anti-trust case is not severe enough. Having read the proposed settlement I am quite sure it does little to prevent Microsoft from using it's monopoly to prevent potential competition and further abuse consumers.

It is my sincere hope that the settlement will be rejected and a penalty imposed which allows for non-Microsoft software to compete.

Thank you,

Chris Olson
